

**University of Waterloo**  
**CS240E, Winter 2022**  
**Programming Question 3 Post Mortem**

**Question 1 [20 marks (Correctness)]**

Note: The comments below apply to students who submitted.

- The most common errors likely arose from rehashing incorrectly and not correctly keeping track of the number of items present in the DPhone hash table at all times.
- The DName hash table was generally well done.
