Lab 17: Discord

Due: Wednesday, March 25, 11:59 PM

We will use Discord, a communication platform, for office hours, labs, and assignment 8.

1. **Create an account.**
   
   a. Navigate to [https://discordapp.com/register](https://discordapp.com/register) & Create an account. If you already have an account, proceed to the next step.
2. **Join the CS105W20 server.**
   
a. Log in using your account.

b. Once logged in, navigate to [https://discord.gg/4B3ARJ7](https://discord.gg/4B3ARJ7) to join the CS105 server.

3. **Connect.**
   
a. Right-click on the name of the instructor (“Sangho Suh”) and click Add Friend, as shown below.

   ![Add Friend](image1)

   If you don’t see the member list, click Member List, as shown below.

   ![Member List](image2)

   b. Click on the “#distant-socializing” channel, as shown below.
c. Introduce yourself. Write, “Hello everyone, I’m {{YOUR NAME}}”. For example, if your name is “John Smith”, write: “Hello everyone, I’m John Smith”, as shown above. Also, mention at least one thing you did while at home. For example, if you binge-watched a Netflix show. Write, “Hello everyone, I’m John Smith. While home, I binge-watched a Netflix show called _______.“ The more detailed, the better!

d. Click on the “#final-project” channel, as shown below.

e. Write about your final project idea(s). You don’t have to stick to this idea for the actual final project, so don’t overthink it. This is to get you thinking about the final project and to connect with others. For example, you could write, “I am thinking of creating a car racing game in which you have to get to the finish line without getting hit by enemy cars driving towards you.” Write at least one idea. If you have several ideas, feel free to ask which one people think is the best.

You do NOT need to submit anything for this lab.
