Post-Mortem

Assignment 08

April 12, 2020

We normally publish the post-mortem for an assignment after it has been marked and released. Here is a list of common errors provided by the graders for assignment 8.

General

• **Local functions also require a purpose and a contract.**

• All the functions in this assignment warrant 2-3 distinct examples. These should appear after the purpose and contract and before the function definition.

• All purpose statements should refer to all of its parameters.

Question 1

• A lot of students did not change the provided test1 to a valid 23tree, thus none of the examples and tests is valid.

• Some students missed parameter references for search.

Question 3a - Templates

• A lot of students missed (...) wt ...) after (string? wt).

• Some students did not include purpose and contract for local helper functions.
