Post-Mortem

Assignment 08

March 20, 2017

Design Recipe

• Many students confuse how consuming a function should be represented in a contract.
• Incorrect types in the contract and confusion about Num/Int/Nat were often.
• Some students missed base case example.
• Many students did not specify require fields.

General

• Some students defined helper function outside of local scope.
• Some students overcomplicated solution by using unnecessary local helper functions.
