University of Waterloo
CS240 Fall 2020 Final Exam Instructions

*Availability start: Tuesday, December 15 at 4PM (Waterloo, Ontario time)

* Once you have downloaded the exam (https://www.student.cs.uwaterloo.ca/~cs240/protect/index.php**), your time has started.** You are allocated 2.5 hours to write the exam and an additional 1.5 hours to create a file or individual files (**one file per question**) and to submit them to Crowdmark. All work must be submitted within 4 hours of when you downloaded the exam or Wednesday Dec 16th at 4:00pm, Waterloo, Ontario time (whichever comes first). We will only mark work that has been submitted on time.

Latest Submission Time: Wednesday, December 16 at 4PM (Waterloo, Ontario time)

Public posts to **Piazza** will be turned off during the exam. Only private posts to instructors will be allowed in the case where you think you have found an error or lack of clarification (read the question again carefully first). We will put any errors or clarifications on Piazza in an Official Final Exam Clarifications post.

Your **Academic Integrity Declaration** is to be submitted to **MarkUs** where we have means to auto-check correct completion.

The integrity of the grade you receive in this course is very important to you and the University of Waterloo. You must read and sign an Academic Integrity Declaration **Final-AID.txt** (found on the course Testing/Exams webpage) before starting work on the assessment and submit it to **MarkUS before the deadline of December 16th at 4:00pm** (i.e. **read, sign and submit now or as soon as possible) or your assessment will not be marked**. The agreement will indicate what you must do to ensure the integrity of your grade.

Your answers to the assessment questions are to be submitted to Crowdmark. After the assessment has started, you will receive email from the Crowdmark mailer with the link for submitting your files (if you do not see it, check your span and junk folders in your email reader).

Submitting to Crowdmark may be done as separate question files (one for each question) **or** *one* PDF, **as long as**, each question answer starts on a new page so you can drag page by page to the correct question in Crowdmark.

Make sure each page has the question number and part labels (if any). You may use LaTeX to create your file or hand write your answer and scan it or take a picture.

Generally speaking, if your answer is longer than a page for a question, it is too long. However, you can still submit more than one page for each question, if necessary (for example, if your writing is large or you include a drawing).

Make sure to allocate enough time at the end to create the necessary file(s) and to submit. Remember, late assessments will not be marked.

More complete instructions for submitting and verifying submission can be found at:
https://crowdmark.com/help/completing-and-submitting-an-assignment/
